

Règlementation de l'ostéopathie au Canada

Catégorie : Règlementation

Publié par [Administration](#) le 1/11/2007

Le titre d'ostéopathe est protégé dans plusieurs provinces canadiennes sauf au Québec, en Ontario, en Colombie-Britannique et en Nouvelle-Écosse.

La règlementation de l'ostéopathie au Canada: un fouillis monumental!!! appartient à chaque province de légiférer en ce qui concerne les professions en général et l'ostéopathie en particulier. À cet égard, le "Collège des Médecins" de chacune des provinces canadiennes, prévoit dans leurs règlements, d'émettre un permis d'équivalence de pratique de la médecine à un docteur en médecine ostéopathique en autant que ce dernier ait obtenu son diplôme dans un des [26 collèges](#) de médecine ostéopathique accrédités par l'American Osteopathic Association. Malgré cela, seule la province de l'Ontario a émis un tel permis jusqu'à présent. Puisque le titre d'ostéopathe n'est pas protégé dans plusieurs provinces, comme au Québec, en Ontario, en Colombie-Britannique et finalement en Nouvelle-Écosse, un groupe de physiothérapeutes a profité de ce vide juridique pour y établir des écoles privées d'enseignement de l'ostéopathie, et y fonder des associations pour leurs gradués. Il faut mentionner que ce même groupe a également profiter de ce même vide juridique pour établir leurs écoles dans d'autres pays, tel qu'en Allemagne, en Suisse et en France. Bien que ce groupe prétende être une organisation internationale, aucune agence des gouvernements provinciaux du Canada ou des autres pays en question plus haut, et aucune association régissant la pratique de l'ostéopathie au niveau mondial comme l'[Osteopathic International Alliance](#) et la [World Osteopathic Health Organization](#) ne reconnaît leur compétence. La triste réalité est que n'importe qui peut s'ouvrir un cabinet d'ostéopathe, dans les provinces mentionnées plus haut, et y traiter des patients sans qu'aucune agence gouvernementale ou loi ne régisse leur pratique ou compétence. À notre avis, cette situation constitue un danger certain pour le public. Le citoyen moyen est donc laissé à lui-même parmi ce méli-mélo de pseudo-ostéopathes et n'a malheureusement aucun moyen de différencier le vrai du faux. **Voici un portrait détaillé de l'ostéopathie au Canada tel que décrit par l'Osteopathic International Alliance: CANADA**

Summary

Osteopathic Medicine is defined as a complete system of medical care with a philosophy that combines the needs of the patient with the current practise of medicine, surgery, and obstetrics. Osteopathic Medicine emphasizes the interrelationship between structure and function, and has an appreciation of the body's ability to heal itself. An osteopathic physician in Canada is a person with full, unlimited practise rights who has achieved the nationally recognized academic and professional standards within the United States to diagnose, and provide treatment based upon the principles of osteopathic philosophy. Individual countries establish the national, academic, and professional standards for osteopathic physicians practicing within their countries.

An osteopath is a non-physician practitioner who has achieved the nationally recognized academic and professional standards within her or his country to practise osteopathic manipulative treatment. Individual countries establish the national academic, and professional standards for osteopaths

practicing within their countries.

Canada consists of ten Provinces and three Territories. Each Province or Territory governs registration of osteopaths in Canada. There are separate Acts for each jurisdiction regulating osteopathic medicine in Canada. In most provinces, title protection for the osteopathic or D.O. designation lies with these regulatory bodies. The province of Quebec has no title protection.

Osteopathic Medicine

Listed below are the licensure requirements for US-trained D.O.s in the provinces and territories of Canada. All the provinces that have provisions for licensing D.O.s as physicians require that D.O.s be graduates of an osteopathic medical colleges accredited and they be or intend to become Canadian citizens. For the provinces or territories that state, "no provisions exist for licensing US-trained D.O.s," it is suggested the individual contact that regulatory authority. While there may not be a provision, the regulatory agency may consider amending its current policy to include recognition of US-trained D.O.s.

Alberta

Scope of Practise: unlimited

Requirements: Must have completed at least 2 years of Graduate Medical Education (GME) accredited by the Accreditation Council for Graduate Medical Education or the American Osteopathic Association and must have passed the Universities Coordinating Council Exam, a basic sciences exam, and have passed all three parts of the licensing examination of the Medical Council of Canada (LMCC).

Ontario

Scope of Practise: Unlimited

In 2002, the Premier of Ontario and the College of Physicians and Surgeons of Ontario (CPSO) announced that changes were being implemented to recognize international medical graduates, including D.O.s who are now recognizing by the CPSO. In addition, the CPSO has created a Fast Track Assessment Program for international medical graduates who wish to practise in Ontario. The Fast Track Assessment is an expedited process designed for doctors with experience. It focuses on an evaluation of practise skills and can be tailored to the individual applicant. By evaluating the practise skills of the individual doctor rather than looking at the grades and training programs, the College acquires a more realistic view of the abilities of the individual physicians. For more recent graduates, there is the Standard Assessment process. It concentrates on examination grades and completion of an approved course of education and residency. All candidates are assessed in the same way. For more information on Ontario's registration, go to www.cpso.on.ca/info_physicians/applicants/regist.htm

Schools of Osteopathy

There are ***no recognized schools of osteopathy in Canada***. Additionally, there is no way for graduates of other international schools to have their osteopathic credentials recognized in Canada. To be registered with a provincial College of Physicians and Surgeons, one must be a graduate of an accredited college of the American Osteopathic Association
